

How Not To Label

The proper shipping name is not written correctly as the UN#, Hazard Class and Packing group are missing. Additionally, incompatible chemicals cannot be packaged together.

Labels must be on point and not overlapping.

Labels must be within 4" of each other and not overlapping other labels.

Labels must be within 4" of each other and not overlapping other labels.

Manual alterations to labels are not permitted and must conform with regulatory requirements.

The proper shipping name and label must be next to each other.

Labels may not be folded or damaged when placing on a shipping container.

Labels may not be folded or damaged when placing on a shipping container.
