Environmental Health & Safety
Radiation Safety Program

Attention supervisors and responsible investigators:

Everyone in your department receiving a dosimetry badge needs to take the RASCAL test online. Everyone taking this test should have already attended the radiation safety lecture training. *Annual refresher trainings are required*.

An activated UNI is required to login to RASCAL. If you do not know your UNI, search for your name in the Columbia Directory. Click on your name to view your UNI. Once you have activated your UNI, you are ready to take the test.

How to take online test and get the rascal certificate

- Go to the RASCAL website

- On the left hand side, under login, choose "Training Center"

- Login using your UNI

- Choose "Safety Courses"

- For INITIAL training, choose "TC0008 - Initial Radiation Safety Training"

- For ANNUAL REFRESHER training: "TC1750 - Annual Radiation Safety Refresher Course"

- On the left hand side of the screen, choose "Take Test"

- Once the test is complete, e-mail badges@columbia.edu with your name and the subject line "I have completed my radiation safety RASCAL training"

View our training schedule for lecture training dates.

If you have problems with the RASCAL system, contact them directly:
E-mail rascal@columbia.edu or call the help line at (212) 851-0213
