

LAB SAFETY AWARENESS

Lab Housekeeping

Good lab housekeeping reduces the number of accidents, minimize risks & consequences of slips, trips, falls, unplanned reactions and fire.

Space is always at a premium. Don't be a hoarder!

- Reducing clutter provides more space for critical research, reduces risks of tripping or potential chemical/biological exposure.
- Limiting flammable materials like paper or cardboard reduces the risk of fire.
- Never block emergency exits, fire extinguishers, safety showers, eyewashes, or electrical panels.
- Consider scheduling frequent lab clean-out days (at least quarterly) and [pickups for chemicals](#) that are no longer needed or used. Make arrangements to service, maintain, or remove broken equipment.
- No food and drinks should be stored or consumed in wet labs.
- Secure razors and sharps in storage when not in use to prevent incidental sharp injuries.
- [Manage chemical waste](#) by proper collection and segregation, closing and labelling the containers.
- [Clean freezer coils](#) periodically to prevent accumulation of dust and potential fires.
